Case-Based Anesthesia: Clinical Learning Guides By George Shorten MD, Stephen F. Dierdorf MD, Gabriella Iohom MD DEAA FCARCSI PhD, Christopher J. O'Connor MD, Charles W. Hogue Jr. MD

This short textbook presents sixty cases with the detail and patient-specific data encountered in actual clinical practice. Cases cover the major points emphasized in the in-training exam and in written and oral boards.

The cases are rigorously developed using two models. The Developed Case model features a step-by-step format that highlights the decisions made at each step. The Case Reflection model features a short narrative, followed by analysis of how the management and outcome might have been improved. Cases are referenced with current articles in support of particular strategies. Each case includes a boxed Key Points section and self-assessment questions.
