Hazards Analysis: Reducing the Impact of Disasters, Second Edition By John C. Pine

The impacts of natural and man-made disasters have increased exponentially over the past few decades. Moreover, with our global interconnectedness and the growing scale of disasters, today's catastrophic disasters can have regional, national, and even global economic consequences.

Following in the tradition of the successful first edition, **Hazards Analysis: Reducing the Impact of Disasters, Second Edition** provides a structure and process for understanding the nature of natural and human-caused disasters. Stressing the role of hazard risk management for public, private, and nonprofit organizations, the author and expert contributors cover problem solving, risk analysis, and risk communications to ensure readers are in a position to identify key problems associated with hazards and the risks that they present.

The book details a systematic process of hazards identification, vulnerability determination, and consequence assessment for the natural, built, and human environment. Using a cross-disciplinary approach, this book effectively demonstrates how to use the results of vulnerability assessment, spatial analysis, and community planning to reduce adverse disaster outcomes and foster social, economic, and environmental sustainability. Throughout, the book stresses that hazards analysis is not an isolated process but one that must engage the local community.

Complete with clearly set objectives, key terms, discussion questions, satellite images and maps, and ancillary websites for further study, this authoritative guide covers every element of the hazard analysis process in a step-by-step format. **Hazards Analysis** presents time-proven strategies for building sustainable communities, identifying and prioritizing risks, and establishing successful disaster prevention and relief strategies *prior to* a disaster.

Editorial Review

Review

"Professionals who work in disaster planning and emergency management will find the second edition of **Hazards Analysis: Reducing the Impact of Disasters** to be a valuable resource."

?John M. White, CPP, President and CEO of Protection Management, LLC, in *Security Management*

About the Author

John C. Pine serves as the director of the Research Institute for Environment, Energy & Economics (RIEEE), and professor in the department of Geography and Planning, Appalachian State University, Boone, North Carolina. He joined the Appalachian faculty in 2009 after serving thirty years at Louisiana State University in Baton Rouge where he directed the graduate and undergraduate Disaster Science and Management Program. At Louisiana State University, he was a professor in the Department of Geography and Anthropology and the department of Environmental Sciences. His research on disasters and emergency management centers on emergency planning, risk assessment, and disaster recovery.

He has worked for many years with public agencies at the federal, state, and local levels as well as non-profit and private entities to identify strategies to enhance preparedness and community sustainability. His publications focus on hazards and disasters including *Technology and Emergency Management* from John Wiley (2007) and *Tort Liability Today* from the Public Risk Management Association (2005).

He is currently on the board of directors of the National Committee for the New River, the Learning Lodge at Grandfather Mountain, and an advisory board for the American Meteorological Society. His publications have been included in *The Journal of Disaster Studies, Policy and Management, Disasters, Journal of Race and Society, International Journal of Mass Emergencies and Disasters, Oceanography, Journal of Emergency Management, Natural Disaster Review, Journal of Environmental Health, and the Journal of Hazardous Materials*. He received his doctorate in higher education administration and public administration from the University of Georgia, Athens, in 1979.

Users Review

From reader reviews:

Jeff Williams:

Within other case, little people like to read book Hazards Analysis: Reducing the Impact of Disasters, Second Edition. You can choose the best book if you'd prefer reading a book. So long as we know about how is important the book Hazards Analysis: Reducing the Impact of Disasters, Second Edition. You can add information and of course you can around the world by the book. Absolutely right, simply because from book you can know everything! From your country till foreign or abroad you will be known. About simple matter until wonderful thing you could know that. In this era, we could open a book as well as searching by internet system. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's go through.

Nicholas Tapia:

Reading a guide tends to be new life style in this era globalization. With looking at you can get a lot of information that could give you benefit in your life. With book everyone in this world may share their idea. Books can also inspire a lot of people. A lot of author can inspire their own reader with their story or their experience. Not only the storyplot that share in the publications. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors in this world always try to improve their expertise in writing, they also doing some analysis before they write to the book. One of them is this Hazards Analysis: Reducing the Impact of Disasters, Second Edition.

Rod Doughty:

Spent a free time to be fun activity to try and do! A lot of people spent their leisure time with their family, or all their friends. Usually they carrying out activity like watching television, likely to beach, or picnic in the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? May be reading a book could be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to consider look for book, may be the publication untitled Hazards Analysis: Reducing the Impact of Disasters, Second Edition can be excellent book to read. May be it can be best activity to you.

Steven Strong:

People live in this new morning of lifestyle always make an effort to and must have the free time or they will get large amount of stress from both everyday life and work. So , if we ask do people have free time, we will say absolutely indeed. People is human not really a huge robot. Then we question again, what kind of activity do you possess when the spare time coming to you of course your answer will probably unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, the particular book you have read will be Hazards Analysis: Reducing the Impact of Disasters, Second Edition.
