Building Web Apps with Ember.js: Write Ambitious JavaScript

By Jesse Cravens, Thomas Q Brady

Building Web Apps with Ember.js: Write Ambitious JavaScript By Jesse Cravens, Thomas Q Brady

If you're a web developer interested in building scalable single-page applications—full-stack, browser-based apps that connect to a backend—this practical guide shows you how to use Ember.js, the popular JavaScript framework based on the model-view-controller (Mvc) architectural pattern. Through the course of the book, you'll learn how to build a prototype Ember application (a musician index called Rock'n'Roll Call), using routers, templates, models, controllers, and views. You'll also understand how Ember's convention over configuration approach helps you persist data, build backend technologies, and create widgets for developing production-capable applications that behave like desktop software.

• Set up workflow management and boilerplate code creation
• Learn how Ember's "developer ergonomics" help you use less code
• Write templates for the book's prototype with Handlebars.js
• Use routers to manage application states without reloading the page
• Connect controllers and views with events, and sync data with data-binding
• Build an Ember backend with a Restful Api or Ruby on Rails
• Use the Ember-Data library to persist data and talk to the backend
• Write reusable encapsulated widgets to extend your applications

Editorial Review

About the Author

Jesse is a Principal Web Engineer at frog where he works with the world's leading companies, helping them to design, engineer, and bring to market meaningful products and services. With 12 years of experience in web application development, Jesse is currently focusing on single page web applications, the mobile web, and HTML5.

Thomas Q Brady has been sketching and prototyping since he was barely able to read, starting with the Commodore Vic 20. Considering his prototypes more toys than anything else, he assumed his collegiate training should be in something more employable, like a double-major arts degree in psychology and philosophy. Later, Thomas fell backward into a legitimate career as a design technologist at frog. Along the way, he has built run-the-business back-office software, business simulations, interactive marketing, high-fidelity prototype hardware and software, Arduino-powered bluetooth caller ID watches and even some web applications for clients and for fun. Along the way, Thomas has enjoyed the opportunity to blog, both independently and for-hire, author a couple whitepapers and even file a couple patents.

Users Review

From reader reviews:

Amanda Grant:

In this 21st hundred years, people become competitive in every way. By being competitive today, people have do something to make these survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that at times many people have underestimated it for a while is reading. Yeah, by reading a book your ability to survive boost then having chance to remain than other is high. For yourself who want to start reading a book, we give you this specific Building Web Apps with Ember.js: Write Ambitious JavaScript book as beginning and daily reading guide. Why, because this book is usually more than just a book.

Brian Rankins:

Reading a reserve tends to be new life style within this era globalization. With examining you can get a lot of information which will give you benefit in your life. With book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A lot of author can inspire their own reader with their story or perhaps their experience. Not only the storyline that share in the publications. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on this planet always try to improve their expertise in writing, they also doing some investigation before they write with their book. One of them is this Building Web Apps with Ember.js: Write Ambitious JavaScript.

Willie Alford:

People live in this new moment of lifestyle always aim to and must have the spare time or they will get lots of stress from both day to day life and work. So , if we ask do people have free time, we will say absolutely without a doubt. People is human not only a robot. Then we consult again, what kind of activity are there when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative within spending your spare time, the actual book you have read is Building Web Apps with Ember.js: Write Ambitious JavaScript.

Ralph Ainsworth:

Playing with family in a park, coming to see the water world or hanging out with friends is thing that usually you may have done when you have spare time, after that why you don't try thing that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Building Web Apps with Ember.js: Write Ambitious JavaScript, you could enjoy both. It is very good combination right, you still would like to miss it? What kind of hangout type is it? Oh can occur its mind hangout folks. What? Still don't buy it, oh come on its identified as reading friends.
