By Jonathan S. Kahan, Hogan Lovells US LLP

**Medical Device Development: Regulation and Law** By Jonathan S. Kahan, Hogan Lovells US LLP

Medical Device Development: Regulation and Law, 2014 Edition, is the "must-have" resource for the novice or veteran medical device regulatory affairs professional. This practical reference provides the most comprehensive and updated analysis of US medical device and diagnostics development and approval requirements anywhere. Since the 2009 edition of this book, new device legislation has been enacted and FDA has issued over a dozen or more important new guidances. The 2014 edition features in-depth analysis of these developments, and addresses how emerging developments and trends are reshaping medical device and combination product regulations in the US. The 2014 edition of this popular and authoritative resource reviews and analyzes the following critical developments since the 2009 edition: \* Update on all the new provisions of the Food and Drug Administration Safety and Improvement Act of 2012 (FDASIA). \* New statutory provisions and guidances related to device reclassification, humanitarian devices, the CDRH appeal process, Section 522 postmarket surveillance, and custom devices. \* New statutory provisions and guidances related to mobile medical apps and medical device software, including medical data software systems. \* Updates on the new organizational structure of CDRH, including revisions to the structure of the Office of Device Evaluation the Office of Compliance, and the Office of In Vitro Diagnostics and Radiological Health. \* Changes to the 510(k) premarket notification process, including new policies on split predicates, when a device cannot be found to be SE, and the new priority review guidance. \* Changes to the pre-submission process, including the end of the pre-IDE process and the birth of the Q-sub. \* New guidances on FDA's Refusal to Accept policies relating to 510(k)s, PMA s, and pre-submissions. \* Update on the investigational device exemption process, including new guidances on early feasibility studies, FDA decisions for IDE investigations, design considerations for pivotal clinical device investigations, and good laboratory practices. \* Changes to the premarket approval application process, including birth of the e-copy and modifications to the advisory panel process. \* New policies and guidances concerning in vitro diagnostic products, including the new guidances on Research Use Only (RUO)/Investigational Use Only (IUO) products, and in vitro companion diagnostics. \* Update on device compliance issues, including the 2013 draft medical device reporting guidance and recall procedures relating to product enhancements. \* New guidances and cases relating to combination products incorporating medical devices.

### **Editorial Review**

#### Review

Great book for a beginner learning about process, or an experienced practitioner in the field. I used prior addition, until i realized it was updated - i testify on matters of value in the field of medical devices, and nothing helps the court understand faster - than a text book you can cite documenting the process of a 510(k) application or a PMA! --Richard Mackenzie, Amazon Verified Purchase

I recently acquired a copy of Jonathan Kahan s book entitled Medical Device Development: Regulation and Law, in its most recent edition. I have been in the regulatory affairs profession for over 23 years now, and can easily navigate websites and references to find the information I need. However, as I was reviewing a recent FDA proposed rule, I found myself repeatedly reaching out to the book as all the information I needed was compiled and easily found in one place, organized by topic, with all needed legislative and regulatory references. Mr. Kahan has done an admirable job in creating this book, and I am thankful to have it on my desk for easy reference when needed. --Tamima Itani, Ph.D., FRAPS, RAC MSVP, Global Regulatory Affairs and Regulatory Compliance, Boston Scientific

#### About the Author

The book is written by Jonathan S. Kahan, Partner, Hogan Lovells US LLP in Washington, D.C. Jon is a co-director of the firm s food, drug, medical device, and agriculture group, and has been practicing in FDA law for 40 years. Jon is also an Adjunct Professor at the George Washington University Law School teaching medical device law. His practice focuses primarily on assisting medical device companies in navigating the U.S. Food and Drug Administration (FDA) regulatory process. He also has an extensive practice in combination products, which includes combinations of drugs, devices, and biologics. In addition to the daily counseling of clients in FDA-related matters, he represents many clients in administrative hearings and trials, and in the federal courts. Jon has published numerous law review and other articles concerning FDA regulatory issues.

#### **From reader reviews:**

#### **Eric Bass:**

This Medical Device Development: Regulation and Law is great reserve for you because the content which can be full of information for you who also always deal with world and also have to make decision every minute. This kind of book reveal it facts accurately using great manage word or we can claim no rambling sentences inside it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but hard core information with lovely delivering sentences. Having Medical Device Development: Regulation and Law in your hand like obtaining the world in your arm, details in it is not ridiculous just one. We can say that no book that offer you world in ten or fifteen minute right but this reserve already do that. So , this is good reading book. Hello Mr. and Mrs. busy do you still doubt this?

### **Many Shirley:**

This Medical Device Development: Regulation and Law is brand-new way for you who has curiosity to look for some information since it relief your hunger of knowledge. Getting deeper you upon it getting knowledge more you know or perhaps you who still having little bit of digest in reading this Medical Device Development: Regulation and Law can be the light food in your case because the information inside this specific book is easy to get through anyone. These books develop itself in the form that is certainly reachable by anyone, that's why I mean in the e-book web form. People who think that in publication form make them feel sleepy even dizzy this publication is the answer. So there is no in reading a reserve especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the idea! Just read this e-book kind for your better life and also knowledge.

### **Ronald Malone:**

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library as well as to make summary for some book, they are complained. Just very little students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring and can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Medical Device Development: Regulation and Law can make you experience more interested to read.

### **Ivan Dinkel:**

What is your hobby? Have you heard that question when you got scholars? We believe that that concern was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person including reading or as examining become their hobby. You have to know that reading is very important and also book as to be the matter. Book is important thing to include you knowledge, except your own teacher or lecturer. You discover good news or update regarding something by book. Numerous books that can you take to be your object. One of them is this Medical Device Development: Regulation and Law.
