The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make) By Windell Oskay

Raymond E. Barrett's Build-It-Yourself Science Laboratory is a classic book that took on an audacious task: to show young readers in the 1960s how to build a complete working science lab for chemistry, biology, and physics--and how to perform experiments with those tools. The experiments in this book are fearless and bold by today's standards--any number of the experiments might never be mentioned in a modern book for young readers! Yet, many from previous generations fondly remember how we as a society used to embrace scientific learning.

This new version of Barrett's book has been updated for today's world with annotations and updates from Windell Oskay of Evil Mad Scientist Laboratories, including extensive notes about modern safety practices, suggestions on where to find the parts you need, and tips for building upon Barrett's ideas with modern technology. With this book, you'll be ready to take on your own scientific explorations at school, work, or home.

Editorial Review

Review

My father's purpose in life was to see the excitement of discovery from children experimenting. It's wonderful seeing Windell Oskay bringing this book back to stimulate the next generation of children.

--Stephen Barrett

As relevant today as when it was first published, this book will support curious people of all ages to engage in serious fun--the starting points for falling in love with science all over again!

--Mike Petrich, Tinkering Studio--Exploratorium

Much, much more than a DIY Lab. It's really a fairly full course in experimental science.

--Forrest M. Mims III, Author and Amateur Scientist

From the Back Cover

In *Make: The Annotated Build-It-Yourself Science Laboratory*, you'll make:

- » A carbon-arc furnace that can melt metal
- » Your own laboratory glassware
- » A cosmic ray-detecting cloud chamber
- » Microscopes--from 25× to 160× power
- » Barometers, thermometers, and hygrometers

- » Magnets, motors, batteries, and capacitors
- » A microtome, anemometer, and seismograph
- » A telescope, spectroscope, and nephoscope
- » Oxygen and hydrogen generators
- » A Campbell-Stokes sunshine recorder

As you build your equipment, you'll get ready for the over 1600 experiments in the book: Isolating hydrogen, growing crystals, finding lifeforms in a drop of water, measuring everything from mass to conductivity to metabolism rates to cosmic radiation, building an electric motor, and tracking the moons of Jupiter!

About the Author

Windell Oskay is the co-founder of Evil Mad Scientist Laboratories, a Silicon Valley company that has designed and produced specialized electronics and robotics kits since 2007. Evil Mad Scientist Laboratories also runs a popular DIY project blog, and many of its projects have been featured at science and art museums and in *Make*, *Wired*, and *Popular Science* magazines. Windell was also a founding board member of

OSHOWA, the Open Source Hardware Association. Previously, Windell has worked as a hardware design engineer at Stanford Research Systems and as a research physicist in the Time and Frequency Division of the National Institute of Standards and Technology. He holds a B.A. in Physics and Mathematics from Lake Forest College and a Ph.D. in Physics from the University of Texas at Austin.

Users Review

From reader reviews:

Sally Watts:

In this 21st century, people become competitive in every single way. By being competitive at this point, people have to do something to make them survive, being in the middle of often the crowded place and notice through surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yes, by reading a book your ability to survive improves then having a chance to remain than other is high. For you who want to start reading the book, we give you this particular *The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make)* book as a basic and daily reading book. Why, because this book is usually more than just a book.

Mary Gillon:

The feeling that you get from *The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make)* will be the more deep you root the information that hides inside words the more you get serious about reading it. It does not mean that this book is hard to be aware of but *The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make)* giving you a buzz feeling of reading. The article author conveys their point in a selected way that can be understood by anyone who reads that because the author of this guide is well-known enough. This book also makes your vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having this specific *The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make)* instantly.

Richard Hunt:

Besides that *The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make)* in your phone, it could give you a way to get more close to the new knowledge or facts. The information and the knowledge you might get here is fresh from your oven so don't become worried if you feel like an outdated person lives in a narrow commune. It is a good thing to have *The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make)* because this book offers you readable information. Do you often have a book but you seldom get what its facts concerning. Oh come on, that will not happen if you have this in your hand. The enjoyable agreement here cannot be questionable, similar to treasuring a beautiful island. Use you still want to miss that? Find this book along with read it from today!

Tammy Jones:

In this particular era which is the greater man or woman or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple method to have that. What you have to do is just spending your time not very much but quite enough to experience a look at some books. One of many books in the top listing in your reading list is The Annotated Build-It-Yourself Science Laboratory: Build Over 200 Pieces of Science Equipment! (Make). This book and that is qualified as The Hungry Hillside can get you closer in becoming precious person. By looking upward and review this guide you can get many advantages.
