

Design with the Desert: Conservation and Sustainable Development

From Brand: CRC Press

Design with the Desert: Conservation and Sustainable Development From Brand: CRC Press

The modern southwestern cities of Phoenix, Tucson, Las Vegas, Albuquerque, and El Paso occupy lands that once supported rich desert ecosystems. Typical development activities often resulted in scraping these desert lands of an ancient living landscape, to be replaced with one that is human-made and dependent on a large consumption of energy and natural resources. **Design with the Desert: Conservation and Sustainable Development** explores the natural and built environment of the American Southwest and introduces development tools for shaping the future of the region in a more sustainable way.

Explore the Desert Landscape and Ecology

This *transdisciplinary* collaboration draws on insights from leading authorities in their fields, spanning science, ecology, planning, landscape development, architecture, and urban design. Organized into five parts, the book begins by introducing the physical aspects of the desert realm: the land, geology, water, and climate. The second part deals with the "living" and ecological aspects, from plants and animals to ecosystems. The third part, on planning in the desert, covers the ecological and social issues surrounding water, natural resource planning, and community development.

Bring the Desert into the City

The fourth part looks at how to bring nature into the built environment through the use of native plants, the creation of habitats for nature in urban settings, and the design of buildings, communities, and projects that create life. The final part of the book focuses on urban sustainability and how to design urban systems that provide a secure future for community development. Topics include water security, sustainable building practices, and bold architecture and community designs.

Design Solutions That Work with the Local Environment

This book will inspire discussion and contemplation for anyone interested in desert development, from developers and environmentalists to planners, community leaders, and those who live in desert regions. Throughout this

volume, the contributors present solutions to help promote ecological balance between nature and the built environment in the American Southwest?and offer valuable insights for other ecologically fragile regions around the world.

Editorial Review

About the Author

Richard A. Malloy is a manager for environmental projects for Arizona State University for the School of Applied Sciences and Mathematics and the Biodesign Institute. He currently oversees projects and facilities dedicated to advancing biotechnology and sustainable solutions to environmental challenges for Arizona State University.

John H. Brock is professor emeritus at the School of Applied Sciences and Mathematics department at Arizona State University (ASU) and founder of the firm Brock Habitat Restoration & Invasive Plant Management LLC. He operates a consulting firm in the area of invasive plant management and landscape restoration.

Anthony C. Floyd, AIA, is a registered architect and green building program manager for the City of Scottsdale. He maintains the city's green building rating standards for residential and commercial development and helps to facilitate Scottsdale's LEED gold mandate for newly constructed and renovated public facilities.

Margaret Livingston is a professor in the School of Landscape Architecture and Planning at the University of Arizona. She teaches a range of courses related to ecological and environmental issues in arid environments and has locally and internationally conducted lectures and workshops that focus on water conservation, wildlife habitat, and use of native plants in urban areas.

Robert H. Webb has worked on long-term changes in natural ecosystems of the southwestern United States since 1976. Since 1985, he has been a research hydrologist with the U.S. Geological Survey in Tucson and an adjunct faculty member of the Departments of Geosciences and Hydrology and Water Resources at the University of Arizona. He has authored, coauthored, or edited 12 books.

Users Review

From reader reviews:

Wendy Brame:

What do you in relation to book? It is not important together with you? Or just adding material when you really need something to explain what your own problem? How about your free time? Or are you busy person? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everybody has many questions above. They have to answer that question due to the fact just their can do in which. It said that about reserve. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need that Design with the Desert: Conservation and Sustainable Development to read.

Ernie Swisher:

People live in this new time of lifestyle always try to and must have the time or they will get lots of stress from both daily life and work. So , when we ask do people have time, we will say absolutely without a doubt. People is human not really a huge robot. Then we request again, what kind of activity do you possess when the spare time coming to anyone of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, the actual book you have read is definitely Design with the Desert: Conservation and Sustainable Development.

Mark Gibson:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try to pick one book that you never know the inside because don't determine book by its protect may doesn't work at this point is difficult job because you are scared that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer may be Design with the Desert: Conservation and Sustainable Development why because the excellent cover that make you consider in regards to the content will not disappoint you. The inside or content is definitely fantastic as the outside as well as cover. Your reading sixth sense will directly make suggestions to pick up this book.

Edward Doucet:

Is it a person who having spare time subsequently spend it whole day through watching television programs or just laying on the bed? Do you need something totally new? This Design with the Desert: Conservation and Sustainable Development can be the response, oh how comes? The new book you know. You are therefore out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these textbooks have than the others?
