

Drafting a Conservation Blueprint: A Practitioner's Guide To Planning For Biodiversity

By Craig Groves, The Nature Conservancy

Drafting a Conservation Blueprint: A Practitioner's Guide To Planning For Biodiversity By Craig Groves, The Nature Conservancy

Drafting a Conservation Blueprint lays out for the first time in book form a step-by-step planning process for conserving the biological diversity of entire regions. In an engaging and accessible style, the author explains how to develop a regional conservation plan and offers experience-based guidance that brings together relevant information from the fields of ecology, conservation biology, planning, and policy. Individual chapters outline and discuss the main steps of the planning process, including:

- an overview of the planning framework
- selecting conservation targets and setting goals
- assessing existing conservation areas and filling information gaps
- assessing population viability and ecological integrity
- selecting and designing a portfolio of conservation areas
- assessing threats and setting priorities

A concluding section offers advice on turning conservation plans into action, along with specific examples from around the world.

The book brings together a wide range of information about conservation planning that is grounded in both a strong scientific foundation and in the realities of implementation.

Editorial Review

Review

"*Drafting a Conservation Blueprint* is highly recommended for any conservation practitioner involved in landscape-scale or regional conservation planning, as well as agency staff, students, and those looking for efficient ways to focus scant conservation dollars in a region."

(*Wild Earth*)

"*Drafting a Conservation Blueprint* is practical enough to be called a handbook, scholarly enough to be called a textbook, and thorough enough to be called a treatise."

(*Ecology*)

"Practical books are often unreadable and theoretical tomes are often impractical. This is that rare book that combines the virtues of both. No planner who deals with nature can afford to be without it."

(*Planning*)

About the Author

Craig R. Groves is Research Biologist and Conservation Planner for the Wildlife Conservation Society in the greater Yellowstone area. He worked for The Nature Conservancy for 13 years, first as a conservation biologist and then as Director of Conservation Planning, a position he held from 1997 to 2002.

Users Review

From reader reviews:

Mark Gibson:

Information is provisions for anyone to get better life, information presently can get by anyone on everywhere. The information can be a understanding or any news even a problem. What people must be consider if those information which is inside the former life are challenging to be find than now's taking seriously which one is acceptable to believe or which one the resource are convinced. If you obtain the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen in you if you take *Drafting a Conservation Blueprint: A Practitioner's Guide To Planning For Biodiversity* as your daily resource information.

Gail Tate:
