Mastering Visual Basic .NET Database Programming By Evangelos Petroutsos, Asli Bilgin

Enter a New World of Database Programming

Visual Basic .NET and ADO.NET facilitate the development of a new generation of database applications, including disconnected applications that run on the Web. *Mastering Visual Basic .NET Database Programming* is the resource you need to thrive in this new world. Assuming no prior experience with database programming, this book teaches you every aspect of the craft, from GUI design to server development to middle-tier implementation. If you're familiar with earlier versions of ADO, you'll master the many new features of ADO.NET all the more quickly. You'll also learn the importance of XML within the new .NET paradigm.

Coverage includes:

- Getting familiar with the ADO.NET object model
- Using the data access wizards
- Taking advantage of new SQL Server 2000 features
- Carrying out XSL Transformations and XPath queries
- Generating XML using the T-SQL FOR XML statement
- Binding controls to ADO.NET result sets
- Arriving at a sound database design
- Tuning your SQL Server 2000 database
- Using the XML Designer in Visual Studio .NET
- Leveraging the data access tools available in the Visual Studio .NET IDE
- Working with .NET data providers
- Choosing between streaming data and caching data
- Working with the Data Form Wizard in Visual Studio .NET
- Using advanced ADO.NET techniques
- Building a threaded application
- Using .NET's advanced exception handling capabilities
- Using the .NET Deployment Project Template

Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

From the Author

When writing this book, I wanted to avoid regurgitating the information that you could find anywhere on the

web or online help. Therefore, you won't find pages and pages of syntactical reference material. All you have to do is hit F1 to get that. Instead, I wanted to provide a conceptual foundation for architecting distributed systems using the .NET paradigm. Once this foundation is in place, I superimpose both the logical and physical layers that create a database driven system. This way, you'll get more than a "type-what-where" approach, you'll understand how .NET database systems should be architected, as well as the reasons behind these design decisions.

The role of data is different in a distributed environment. Most often, you must rely on outdated snapshots. Yes, outdated, because as soon as the data leaves the database, it gets old quickly. Disconnected users are more common, not merely because of the prevalence of the Internet (which users browse from their desktop), but also because of the spread of wireless devices, such as cell phones and PDAs. Because of this, you'll have to understand how to work with data caching, streams, and synchronization.

On a technical level, how you design and write your data access code has changed. The VB runtime has been replaced by a unified CLR. More than likely, you'll be working with the .NET base classes and .NET data providers, rather than ADO or OLE DB. You'll need to understand how to program with XML and its satellite technologies, such as XPath and XSLT. Relational data is not the only way to store your data; both relational and hierarchical data schemas play a vital role. You'll cover all these concepts and technologies within Mastering Visual Basic.NET Database Programming.

Bill Kelly:

What do you think of book? It is just for students since they are still students or it for all people in the world, exactly what the best subject for that? Just you can be answered for that problem above. Every person has several personality and hobby per other. Don't to be compelled someone or something that they don't want do that. You must know how great as well as important the book Mastering Visual Basic .NET Database Programming. All type of book is it possible to see on many options. You can look for the internet solutions or other social media.

Jose German:

In this time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. The particular book that recommended to you is Mastering Visual Basic .NET Database Programming this publication consist a lot of the information with the condition of this world now. That book was represented so why is the world has grown up. The language styles that writer use to explain it is easy to understand. Typically the writer made some exploration when he makes this book. Here is why this book suited all of you.

Michael Lucius:

As we know that book is essential thing to add our knowledge for everything. By a reserve we can know everything we want. A book is a list of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This publication Mastering Visual Basic .NET Database Programming was filled with regards to science. Spend your spare time to add your knowledge about your research competence. Some people has different feel when they reading any book. If you know how big benefit of a book, you can really feel enjoy to read a guide. In the modern era like at this point, many ways to get book which you wanted.

Irving Dorn:

Some individuals said that they feel bored when they reading a publication. They are directly felt it when they get a half elements of the book. You can choose typically the book Mastering Visual Basic .NET Database Programming to make your reading is interesting. Your current skill of reading expertise is developing when you such as reading. Try to choose simple book to make you enjoy to study it and mingle the opinion about book and looking at especially. It is to be initial opinion for you to like to open a book and read it. Beside that the book Mastering Visual Basic .NET Database Programming can to be a newly purchased friend when you're experience alone and confuse in doing what must you're doing of their time.
