By Sanjay M. Mishra

Wearable Android: Android Wear and Google FIT App Development By Sanjay M. Mishra

Software Development/Mobile/Android/Wearable/Fitness

Build "Wearable" Applications on the Android Wear and Google Fit Platforms

This book covers wearable computing and wearable application development particularly for Android Wear (smartwatches) and Google Fit (fitness sensors). It provides relevant history, background and core concepts of wearable computing and ubiquitous computing, as a foundation for designing/developing applications for the Android Wear and Google Fit platforms. This book is intended for Android wearable enthusiasts, technologists and software developers.

- Gain insight into “wearables” in the modern consumer ecosystem of a multitude of devices, ubiquitous computing, cloud computing and intelligent personal assistants
- Learn the Android Wear and Google Fit APIs and jump-start hands-on development including: setting up an Android development environment suitable for Android Wear and Google Fit , setting up smartwatch and fitness devices for development and debugging , writing applications that install and execute on Android Wear (smartwatch) devices , and applications that run on your handheld Android devices and find and connect to fitness sensors and access fitness data, and more
- Catch up with the new Android 5.0 “Lollipop”, Android Studio and the gradle based build system

Learn how to write applications for smart watches and fitness sensors on the Android/Google ecosystem.

“Sanjay’s tome provides a comprehensive and timely treatment of the essential points of current Wearable technology and Android Wearable development techniques. The easygoing and comprehensive examples make this book a joy to discover and a delight to peruse. Highly recommended!”

- Rudi Cilibrasi, Computer Scientist

“The text provides a rich and immersive overview of the field of Wearable computing that is solidified by the impressive set of examples. I was simultaneously entertained as well as educated, and would highly recommend this book to anyone that is looking to get started with Wearables.”

- Nathan Blair, Software Engineer & Entrepreneur

Sanjay M. Mishra began programming in C on various flavors of Unix in the early 1990s. Over the years he has developed diverse software systems spanning web applications and services, messaging, VoIP, NoSQL databases, as well as mobile and embedded platforms. He has worked for companies such as Intertrust, Eyecon Technologies, CallSource, nVoc (formerly Sandcherry, Inc.) and the Starz Entertainment group.

Users Review

From reader reviews:

Gayle Stalder:

What do you in relation to book? It is not important with you? Or just adding material when you really need something to explain what the one you have problem? How about your extra time? Or are you busy particular person? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every person has many questions above. They must answer that question since just their can do which. It said that about guide. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this Wearable Android: Android Wear and Google FIT App Development to read.

Frances Wiggins:

Do you have something that that suits you such as book? The book lovers usually prefer to pick book like comic, small story and the biggest the first is novel. Now, why not hoping Wearable Android: Android Wear and Google FIT App Development that give your entertainment preference will be satisfied by reading this book. Reading behavior all over the world can be said as the means for people to know world considerably better then how they react when it comes to the world. It can't be stated constantly that reading practice only for the geeky person but for all of you who wants to be success person. So , for all you who want to start studying as your good habit, you can pick Wearable Android: Android Wear and Google FIT App Development become your starter.

Randy Jones:

Many people spending their time frame by playing outside having friends, fun activity having family or just watching TV all day every day. You can have new activity to spend your whole day by reading a book. Ugh, do you think reading a book really can hard because you have to use the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Cell phone. Like Wearable Android: Android Wear and Google FIT App Development which is finding the e-book version. So , why not try out this book? Let's notice.

Guadalupe McCoy:

A lot of book has printed but it is different. You can get it by web on social media. You can choose the very best book for you, science, comedy, novel, or whatever by searching from it. It is known as of book Wearable Android: Android Wear and Google FIT App Development. You can include your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make you actually happier to read. It is most critical that, you must aware about e-book. It can bring you from one location to other place.
