Editorial Review

From the Author

This book is available as an e-book or a paperback through Amazon.

From the Back Cover

The humanoid alien Klaatu and the giant robot Gnut suddenly materialize in Washington, D.C., in a time-travel space ship. Two unfathomable beings from somewhere else in the universe. The murder of Klaatu ruins Earth's attempt to peacefully welcome the first interstellar visitors. And one man tries to solve the mystery of why Gnut remains silent, imperious, and unassailable.

About the Author

Harry Bates wrote this classic short story/novella in 1940 for "Astounding" science fiction magazine. His story was adapted for two movies in 1951 and 2008, both titled "The Day the Earth Stood Still." Hollywood made many changes for the movies. Dennis Herrick is providing this reprint of the original story published by the magazine because of his interest in first-contact stories and extensive collection of first-contact books.
