### Earthquakes and Coseismic Surface Faulting on the Iranian Plateau: 18 (Developments in Earth Surface Processes) By Manuel Berberian

*Earthquakes and Coseismic Surface Faulting on the Iranian Plateau* is a comprehensive and well-illustrated multi-disciplinary research work that analyzes the human and physical aspects of the active faults and large-magnitude earthquakes since ancient times on the Iranian Plateau. The long-term historical, archaeological, and sociological record of earthquakes discussed here gives insight into earthquake magnitudes, recurrences, fault segmentation, clustering, and patterns of coseismic ruptures from prehistoric times to the present. The first part of the book examines oral traditions and literature of the region concerned with earthquakes, particularly in folklore, epic literature, and theology. The second part assesses dynamic phenomena associated with earthquakes, including active tectonics, archaeoseismicity, and coseismic surface faulting throughout the twentieth century.

This work is a valuable technical survey and an essential reference for understanding seismic hazard analysis and earthquake risk minimization in earthquake-prone developing and developed countries throughout the world.

- Provides a reference for seismic hazard evaluation and analysis
- Covers data dealing with crustal deformations caused by earthquake faulting and folding since historic times
- Presents unique and complete data for use in empirical relation analyses in all regions

### **Editorial Review**

#### About the Author

Manuel Berberian was born on October 27, 1945 into an immigrant Armenian ethnic-religious minority in Tehran. He received a BSc degree in geology from the University of Tehran in 1968, and a PhD degree in earthquake seismology and active tectonics from the University of Cambridge, United Kingdom in June 1981. He was the first Armenian and the second Iranian earth scientist ever to be accepted at the University of Cambridge, UK. He is Emeritus Professor of Geosciences at the Tehran and Tarbiat Modarres Universities, and at present teaches at the Ocean County College, Toms River, NJ, USA. He is a certified professional geologist in the USA and a member of the New York Academy of Sciences and American Geophysical Union. He is a leading international earthquake expert on the Iranian Plateau and the Middle East. With his wife and son he immigrated to the USA in 1990.

He is a world renowned research scientist on seismotectonics, earthquake seismology, historical earthquakes, archaeoseismicity, palaeo- and active-tectonics, geology, and geologic hazards of the Iranian plateau, with 43 years of academic and research experience. He pioneered the study of plate tectonics and seismotectonics in Iran and was the founder of the 'Tectonics and Seismotectonics Research Department' of the Geological Survey of Iran in Tehran in 1971; the first research center established in this field in the Middle East. He has been a pioneer in the application of plate tectonics to Iranian geology and seismology, and has been responsible for much of what is known about the geology, tectonics, seismotectonics, archaeoseismicity, active faulting/folding, and seismicity of the Iranian Plateau, as well as human aspects of earthquakes, earthquake-fault hazard and risk assessment, and history and mythology of the ancient Iranian-Armenian ancient civilizations.

He has authored more than 300 reports and books; out of which about 110 research studies were published as peer reviewed papers in Europe and the USA, and 10 books in English and Persian; and has prepared over 193 technical reports for seismic hazard and risk assessments of major projects such as nuclear power plants, hydroelectric dams, refineries, lifelines, and large urban developments. He began studying archaeology and the ancient history of Iran to use the rich archaeological and historical records to expand the knowledge of Iranian seismicity, active faulting, and their hazards and risks to the society. Lately he entered the domain of environmental science and engineering in the States.

### **Users Review**

#### **From reader reviews:**

#### **Michelle Sanders:**

In this 21st millennium, people become competitive in every way. By being competitive right now, people have to do something to make these people survive, being in the middle of often the crowded place and notice by surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yeah, by reading a publication your ability to survive boost then having chance to endure than other is high. In your case who want to start reading some sort of book, we give you this kind of Earthquakes and Coseismic Surface Faulting on the Iranian Plateau: 18 (Developments in Earth Surface Processes) book as beginning and daily reading e-book. Why, because this book is more than just a book.

**Robert Zamora:**

Reading can called imagination hangout, why? Because when you find yourself reading a book specially book entitled Earthquakes and Coseismic Surface Faulting on the Iranian Plateau: 18 (Developments in Earth Surface Processes) your thoughts will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely will become your mind friends. Imaging just about every word written in a reserve then become one contact form conclusion and explanation this maybe you never get just before. The Earthquakes and Coseismic Surface Faulting on the Iranian Plateau: 18 (Developments in Earth Surface Processes) giving you one more experience more than blown away your mind but also giving you useful details for your better life within this era. So now let us show you the relaxing pattern is your body and mind is going to be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

**Geraldine Schrader:**

Beside this kind of Earthquakes and Coseismic Surface Faulting on the Iranian Plateau: 18 (Developments in Earth Surface Processes) in your phone, it may give you a way to get nearer to the new knowledge or information. The information and the knowledge you may got here is fresh from your oven so don't always be worry if you feel like an aged people live in narrow commune. It is good thing to have Earthquakes and Coseismic Surface Faulting on the Iranian Plateau: 18 (Developments in Earth Surface Processes) because this book offers for your requirements readable information. Do you oftentimes have book but you don't get what it's exactly about. Oh come on, that will not end up to happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss that? Find this book in addition to read it from today!

**Joseph Rankins:**

You can obtain this Earthquakes and Coseismic Surface Faulting on the Iranian Plateau: 18 (Developments in Earth Surface Processes) by visit the bookstore or Mall. Simply viewing or reviewing it could to be your solve challenge if you get difficulties for your knowledge. Kinds of this reserve are various. Not only by means of written or printed but additionally can you enjoy this book simply by e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.
