Toxicology: A Case-Oriented Approach By John Joseph Fenton

REAL-LIFE CASES, TUTORIAL QUESTIONS, NARRATIVE HISTORY

Intriguing anecdotal pedagogy, like the alleged arsenical poisonings of Napoleon and President Taylor and the probable mercury overdose of Isaac Newton, is one of the things that set *Toxicology: A Case-Oriented Approach* apart from other toxicology texts. Based on an undergraduate-graduate combined toxicology course at West Chester University, this innovative text captures readers' interest by combining modern case studies, historical cases, and hundreds of illustrations and tables. Each chapter presents several case scenarios that involve the reader with questions about diagnosis, testing methods, treatment, and other pertinent information.

TOXICOLOGY FOR THE LABORATORY AND THE EMERGENCY ROOM

In an easy-to-read style, this book covers the major organ systems and reviews the effects of toxins in each system. Most contemporary books are almost entirely clinical or entirely analytical. *Toxicology: A Case-Oriented Approach* treats each area extensively to benefit students and professionals who need to know aspects of both. It describes diagnosis and treatment of each specific poisonous exposure and discusses chemical basis and the laboratory testing of toxins. This dual perspective, coupled with the book's interesting narrative approach, lets readers quickly absorb the information they need to understand toxicology in the laboratory and in the Emergency Department.

Editorial Review

Review

"brings together toxicology, clinical medicine and bioanalytical sciences in an easily understood narrative to help ensure a greater cross-disciplinary understanding to support the highest standard of poisoned patient treatment a useful reference book for undergraduates; it will be especially helpful for post-graduates and physician preparing for professional qualifications. The book could also be of interest to the clinical toxicologists and academic teacher." -Peter H. Bach, Celltech Research and Development "For 10 years I taught a graduate course, 'Toxicology and Drug Analysis', and a problem I faced was the lack of a suitable textbook. This problem appears to be solved with the publication of Toxicology: A Case-Oriented Approach. Sixty-three interesting and pertinent case studies are woven through this book, representing a new approach to teaching this often confusing and complicated subject... In short, this book is an excellent resource for teachers, clinical and forensic toxicologists, and physicians practicing emergency medicine." -James F. Wesley, Monroe County Crime Laboratory "a fun book to read and easily involves the reader with a casual narrative style that is great for student learning and rapidly relating information to the emergency room, laboratory, and mechanisms of present-day toxicology. The 35-page index is a masterpiece an intriguing and innovative book that holds the reader's attention with unexpected ease. The information is accurate, it is clearly and practically presented, and the reader is left with the nagging feeling that 'This is exciting, and I want to learn more!' What greater tribute can an author and an instructor receive than to be appreciated for a great presentation of a stimulating and dynamic discipline." - Veterinary and Human Toxicology, December 2002 "written in an easily understood and enjoyable manner This book is a unique and valuable attempt to acquaint two different disciplines that commonly depend on each other. Clearly they would be more effective if they had a better understanding of the other's problems. It could be used as a textbook in introductory toxicology courses or adjunctive reading for basic toxicologists. Physicians can learn valuable insights into interpretation of laboratory investigations of their patients. The quality of either discipline's conclusions would be improved by this shared knowledge." - Sheldon L. Wagner, M.D. in Doody's Notes "A major strength of this book is its reliance on case studies to stimulate the interest of the reader. These case studies have been carefully selected for their abilities to teach important principles related to toxicology. Also, Fenton includes many interesting anecdotes related to the history of toxicology. This book is thorough and comprehensive in its coverage of the toxicology subject and manages to maintain reader interest through hands-on exercises placed throughout." - R. Saferstein, Widener University, in CHOICE

Users Review

From reader reviews:

Susan Swain:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the Mall. How about open or read a book titled Toxicology: A Case-Oriented Approach? Maybe it is for being best activity for you. You already know beside you can spend your time with your favorite's book, you can better than before. Do you agree with the opinion or you have some other opinion?

Lori Roth:

Reading a e-book tends to be new life style with this era globalization. With studying you can get a lot of information that will give you benefit in your life. Using book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their own reader with their story or even their experience. Not only the storyplot that share in the guides. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors on earth always try to improve their proficiency in writing, they also doing some research before they write to their book. One of them is this Toxicology: A Case-Oriented Approach.

Robert Stitt:

Are you kind of busy person, only have 10 or maybe 15 minute in your day to upgrading your mind ability or thinking skill even analytical thinking? Then you are receiving problem with the book when compared with can satisfy your small amount of time to read it because this all time you only find guide that need more time to be read. Toxicology: A Case-Oriented Approach can be your answer as it can be read by you who have those short free time problems.

Matthew Ibarra:

What is your hobby? Have you heard this question when you got college students? We believe that that concern was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person including reading or as studying become their hobby. You need to understand that reading is very important and book as to be the factor. Book is important thing to add you knowledge, except your personal teacher or lecturer. You find good news or update in relation to something by book. Numerous books that can you go onto be your object. One of them is Toxicology: A Case-Oriented Approach.
