By Kevin O'Hara

## Multiaged Silviculture: Managing for Complex Forest Stand Structures By Kevin O'Hara

This book presents the latest scientific and management information on multiaged silviculture, an emerging strategy for managing forestry systems worldwide. Over recent decades, forest science and management have tended to emphasize plantation silviculture. Whilst this clearly meets our wood production needs, many of the world's forests need to be managed far less intensively and more flexibly in order to maintain their natural ecosystem functions together with the values inherent in those processes. Developing multiaged management strategies for these complex forest ecosystems represents a global challenge to successfully integrate available science with sustainable management practices.

Multiaged Silviculture covers the ecology and dynamics of multiaged stands, the management operations associated with regeneration, tending, and stocking control, and the implications of this strategy on production, genetic diversity, and stand health. It is primarily aimed at graduate level students and researchers in the fields of forestry and silviculture, but will also be of relevance and use to all professional foresters and silviculturists.

### Editorial Review

#### Review

"O'Hara provides a well-written synthesis of the social considerations connected to this type of forest management. Numerous photographs, diagrams, tables, and graphs; comprehensive reference list. Recommended." --*Choice*

"*Multiaged Silviculture* is a valuable addition to the bookshelf of all natural resource managers working in forests. ... Overall, O'Hara has done a wonderful job synthesizing the literature on the subject through to the present, and provides a look forward to the future of forest management and the role of multiaged silviculture." --*Journal of Forestry*

"Many of O'Hara's previous scholarly writings reflected his skill as a writer with an ability to render complicated subjects into neatly packaged forms of decision-support for forestry students and professionals. That acumen is also presented here: the text is well written, well organized, and generally accessible. ... Graduate students and researchers are the target audience for this book, but it can be equally appreciated and enjoyed by curious forestry professionals and undergraduate students. For them, it is a desk reference that belongs alongside familiar classics." --*Ecology*

"[A]n excellent treatment of "complex" silviculture... It is a must read for every forester especially where these issues are important driving mandates. And I would encourage every forester to have a copy available for reference at the very least." --*Mark S. Ashton, The Quarterly Review of Biology*

#### About the Author

Kevin O'Hara, *Professor of Silviculture, University of California- Berkeley*

Kevin O'Hara is Professor of Silviculture at the University of California - Berkeley where he teaches field and classroom courses in forestry. He received his Ph.D. from the University of Washington and taught for 8 years at the University of Montana before joining the University of California faculty. He is the author of over 120 scientific papers and served on the editorial boards or as associate editor of the *European Journal of Forest Research*, *Forestry*, and the *Journal of Forestry*. His research focuses on a variety of aspects of forest stand dynamics and their application to silviculture. However, the bulk of his research focuses on multiaged stand dynamics and silviculture. He has published over 40 papers on the topic of multiaged silviculture and has served as the leader of the International Union of Forest Research Organizations (IUFRO) Uneven-aged Silviculture Research Group (IUFRO 1.05).

## Users Review

### From reader reviews:

#### Debra Richardson:

Do you among people who can't read enjoyable if the sentence chained in the straightway, hold on guys this specific aren't like that. This Multiaged Silviculture: Managing for Complex Forest Stand Structures book is readable through you who hate those straight word style. You will find the details here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to deliver to you. The writer regarding Multiaged Silviculture: Managing for Complex Forest Stand Structures content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the articles but it just different such as it. So , do you still thinking Multiaged Silviculture: Managing for Complex Forest Stand Structures is not loveable to be your top collection reading book?

#### Rudy Nixon:

Information is provisions for those to get better life, information today can get by anyone at everywhere. The information can be a information or any news even a huge concern. What people must be consider whenever those information which is inside the former life are hard to be find than now could be taking seriously which one is suitable to believe or which one the resource are convinced. If you get the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Multiaged Silviculture: Managing for Complex Forest Stand Structures as the daily resource information.

#### Harry Greene:

The e-book untitled Multiaged Silviculture: Managing for Complex Forest Stand Structures is the reserve that recommended to you you just read. You can see the quality of the reserve content that will be shown to a person. The language that author use to explained their ideas are easily to understand. The article author was did a lot of research when write the book, and so the information that they share for your requirements is absolutely accurate. You also can get the e-book of Multiaged Silviculture: Managing for Complex Forest Stand Structures from the publisher to make you more enjoy free time.

#### Jeanne Newman:

Do you have something that you enjoy such as book? The publication lovers usually prefer to select book like comic, short story and the biggest you are novel. Now, why not seeking Multiaged Silviculture: Managing for Complex Forest Stand Structures that give your fun preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the method for people to know world far better then how they react when it comes to the world. It can't be mentioned constantly that reading addiction only for the geeky man but for all of you who wants to end up being success person. So , for all of you who want to start looking at as your good habit, you can pick Multiaged Silviculture: Managing for Complex Forest Stand Structures become your own personal starter.
